2. Requirements

The Web Smart Switch provide remote login interface for manage; the following equipments are necessary for further management.

- 1 -

Figure 3-1 IP Management diagram

The following shows how to start up the **Web Management** of the Web Smart Switch, please note the Web Smart Switch is configured through an Ethernet connection, please make sure the manager PC must be set on the same **IP subnet address**.

For example, the default IP address of the Web Smart Switch is **192.168.0.100**, then the manager PC should be set at **192.168.0.x** (where x is a number between 1 and 254, except 100), and the default subnet mask is 255.255.255.0.

Login the Web Smart Switch

1. Use Internet Explorer 7.0 or above Web browser, enter IP address **<http://192.168.0.100>** (the factory-default IP address) to access the Web interface.
2. When the following dialog box appears, please enter the default password "**admin**". The login screen in Figure 3-2 appears.

- 3 -

- **Workstation** installed with Ethernet NIC (Network Card)
- Workstations of subscribers running Windows XP/2003, Vista, Windows 7, MAC OS X, Linux, Fedora, Ubuntu or other platform compatible with TCP/IP protocols.
- **Ethernet Port connect**
 - ◆ Network cables - Use standard network (UTP) cables with RJ-45 connectors.
 - ◆ Above Workstation installed with WEB Browser and JAVA runtime environment Plug-in

It is recommended to use Internet Explorer 7.0 or above to access the Web Smart Switch.

3. Start Web Management

The Web Smart Switch provides a built-in browser interface. You can manage it remotely by having a remote host with Web browser, such as Microsoft Internet Explorer, Mozilla Firefox, Google Chrome or Apple Safari.

- 2 -

Default IP Address: **192.168.0.100**

Default Password: **admin**

Figure 3-2 Login screen

3. After entering the password, the main screen appears as Figure 3-3.
