

How do you set dynamic IP to connect the DVR-1671?

You need one router. This router has "port forwarding" and "Virtual Server" Function. We use the Planet WNRT-625

This is our topology:

This is our test environment.

Please refer our setting.

Step1: You log-in router UI and set router "LAN IP". The DVR-1671 IP and "LAN IP" must have in the same Network segment
