

1-port RS232/422/485 Modbus Gateway

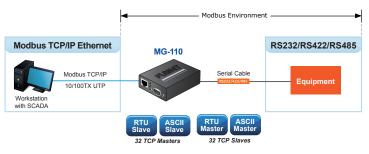

Standard Modbus TCP/RTU/ASCII Network Integration

PLANET MG-11x 1-port RS232/422/485 Modbus Gateway Series supports the standard Modbus Protocol, which makes it possible for converting any Modbus Protocols between Modbus TCP, Modbus RTU, and Modbus ASCII for all supported hardware interfaces. Its serial protocol can be used for industrial automation where SCADA or HMI system is in place. Moreover, its network integration can be upgraded from the SNMP network to the automated Modbus TCP network, which brings interconnection over Ethernet longer distances, thus making a network infrastructure more flexible.

A Conversion Bridge for Flexible Network Deployment

The MG-11x Series can be a conversion bridge between the equipment with the Modbus RTU/ASCII Protocol and the administrator workstations that run the Modbus TCP/IP Protocol. The RS232/422/485 serial interface of the MG-11x Series provides the Modbus RTU/ASCII operation mode and various baud rate options to meet the demand of integration between the Modbus TCP/IP Protocol, Modbus RTU Master/ Slave Protocol and Modbus ASCII Master/Slave Protocol.

Serial Interface

- One DB9 interface supports RS232, 2-wire RS485, 4-wire RS485 and RS422 standards
- Asynchronous serial data rates up to 921600bps

Ethernet Interface

- 1-port 10/100BASE-TX RJ45 or 100BASE-FX interface with auto MDI/MDI-X function
- Ethernet ports support Ethernet switch or cascading operation for easy wiring

Management Function

- Built-in IP-based Web interface and telnet interface for remote management
- Software Protocol supports Modbus TCP, Modbus RTU,
 Modbus ASCII, IP, ARP, DHCP and DNS
- Supports RTU Master, RTU Slave, ASCII Master, and ASCII Slave four serial operation modes via management interface
- · Master mode supports 32 slave TCP connection requests
- Slave mode supports 32 TCP master connections
- PLANET Modbus Gateway utility for finding client device on the network.
- PLANET Smart Discovery utility automatically finds the client devices on the network
- Firmware upgrade/configuration backup and restore via HTTP protocol

Case and Installation

- · Compact size for easy Installation:
 - Standalone Wall mountable or DIN-rail mounting (optional accessory)
 - Co-works with PLANET media chassis (MC-700/1500)
- -10 to 60 degrees C operating temperature
- · Reset button for resetting to factory default

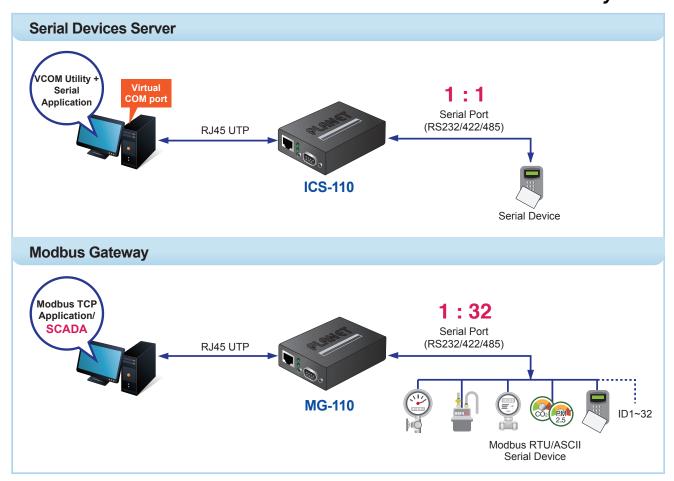

The advantage of having the MG-11x Series is to assist users to build an environment between the Modbus TCP Protocol and the Modbus RTU/ASCII Protocol easily, thus offering an application solution to the control equipment without Ethernet ports, and the control equipment can only control through a PC workstation or control panel.

In addition, the effective integration solution of Modbus Ethernet devices, Modbus serial equipment or multi Modbus master / slave in an hybrid network brings the following:

- Master mode supports up to 32 slave TCP connection requests
- Slave mode supports up to 32 TCP master connections

Differences between Serial Devices and Modbus Gateway

Remote Management

The MG-11x Series makes the connected Modbus RTU/ASCII equipment become IP-based facilities and is able to connect to the Modbus TCP/IP network via its R232/422/485 serial interface and 10/100BASE-TX RJ45 or 100BASE-FX Ethernet port. It provides a remote web management and telnet Interface for efficient remote network management. The MG-11x Series also provides PLANET Modbus Gateway utility tool and supports PLANET Smart Discovery utility to help network administrator to easily get the current IP subnet address information or change the IP subnet address setting of the MG-11x Series.

Remote Management

Modbus Serial Port State Monitoring

The MG-11x Series shows the details of the total bytes transmitted and received on the RS232/422/485 serial interface, and the detailed total number of frames transmitted and received on the remote web/telnet management interface. This function allows network administrator to check the status and statistics of the MG-11x Series via the single RS232/422/485 serial interface.

Fiber-optic Link Capability Extends the Range of Network Deployment (Only MG-115A)

The maximum distance between two IP devices via Ethernet UTP cable is 100 meters. To flexibly extend the deployment range of Modbus gateway, the MG-115A's SFP slot supporting 100BASE-FX SFP modules, and more can reach a transmission distance of up to 120km.

Easy Chassis Installation

The MG-11x Series can be used as a stand-alone unit or as a slide-in module to the PLANET Media Converter Chassis (MC-700 and MC-1500 chassis series). The media chassis can assist in providing DC power to the MG-11x Series and can be DIN-rail or wall mounted for efficient use of cabinet space, without the need of replacing the existing serial equipment and software system.

Optional installation method

DIN-rail Installation

Wall-mount Installation

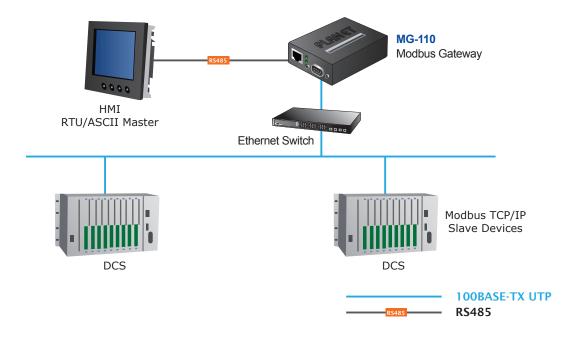

Applications

RTU/ASCII Master to Multi Modbus TCP/IP Slaves

The MG-11x Series can act as a bridge between the RTU/ASCII master equipment and the multi-TCP/IP slave equipment in a Modbus TCP/IP networking environment to control multi-TCP/IP slave equipment via the RTU/ASCII master equipment.

Operation Mode

RTU Master/RTU Slave/ASCII Master/ASCII Slave

Master mode: Supports up to 32 slave TCP connection requests

	Slave mode: Supports up to 32 master TCP connection requests		
Ethernet Interface	Grand model. Cupper to up to up made. The Commodition		
Ethernet Ports	1 x RJ45	1 x SFP	
Standard	10/100BASE-TX	100BASE-FX	
Distance	Distance	2Km~120Km, vary on SFP modules	
ESD Protection	6KV		
Hardware			
Installation	DIN-rail kit and wall-mount ear		
Dimensions (W x D x H)	97 x 70 x 26mm	97 x 70 x 26mm	
Weight	184 g	185 g	
	System: Link		
LED Indicators	TP/SEP: Link/Active		

LED Indicators	TP/SFP: Link/Active
	Serial Port: Active
Power Requirements	External Power Adaptor 5V DC / 24 max

Power Consumption External Power Adaptor 5V DC / 2A max.

Power Consumption 5.5 watts (max)
Mechanical Metal

Management

	Web management
	Telnet Console management
Managament Interfaces	Windows-based MB VCOM Utility management
Management Interfaces	SNMPv1, v2c / SNMP Trap
	LINII NIMO magnitaging

UNI-NMS monitoring
PLANET Smart Discovery Utility
IP Version
IPv4

Operation Mode RTU Master

ASCII Master

ASCII Slave

Virtual COM Utility Platform Supports	Windows-based Only:
	Windows XP
	Windows Server 2003
	Windows 7
	Windows Server 2008
	Windows 8 (Must install the latest version of WinPcap)
	Windows Server 2012 (Must install the latest version of WinPcap)
